

A scatter plot comparing 'Ground truth' (blue circles) and 'Estimates' (red crosses) for the 'x' variable. The x-axis ranges from -150 to 150, and the y-axis ranges from -10 to 10. The data points are clustered in three main regions: a small cluster at the bottom left (around x=-140, y=-8), a larger cluster in the middle left (around x=-110, y=-2), and a larger cluster at the top left (around x=-100, y=2). The 'Estimates' points generally follow the 'Ground truth' points but show some dispersion, particularly in the top-left cluster where several points are outliers.
